Applications of meteorological principles to environmental problems, though broadly known, are neither widely understood nor studied in detail. With increasing awareness of environmental status and for sustainable development without environmental degradation, much care is being taken, particularly in respect of atmospheric environment. Even though Environmental Meteorology forms part of the curriculum of M.Sc. (Environmental Science) in universities there is no comprehensive textbook available on the subject. This book, encompassing all the aspects of Environmental Meteorology, is being brought forth sensing that very lacuna. Besides being used as a textbook, it would also serve as a reference book to Environmental Experts as well as Scientists/Engineers in State and Central Pollution Control Boards, as also industries like Indian Oil Corporation, National Thermal Power Corporation and the likes.
