A First Study of the Statistics of Pulmonary Tuberculosis (Classic Reprint)

By Karl Pearson

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A First Study of the Statistics of Pulmonary Tuberculosis Approaching pathological inheritance from the modern statistical standpoint it is almost heartrending to notice the great amount of effort and energy wasted in the collection of data bearing on the inheritance of disease. We want to know whether the tendency to disease may be assumed to be inherited at the same rate as other physical and mental characters in the organism. If this can be shown to be reasonable, the hereditary factor can be at once assigned its due influence and position. But the data by which this preliminary inquiry can be satisfactorily answered are wholly wanting. We are told, for example, that a family history of tuberculosis or of cancer exists in such and such a percentage of cases, and this information is extended even to the differences of such percentages for cancer in various parts of the organism. But in 99 cases out of the 100, while a brother or a sister, an uncle or an aunt will be recorded as having cancer, no...
