University of the State of New York bulletin

By University of the State of York

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 160 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: . . . seem to have delayed the appearance of insects. --Ap. 28. Webs of the apple tree tent caterpillar (*Malacosoma americanum* Fabr.) began to appear Ap. 30 and were by no means abundant May 10. The weather has been too cold for any rapid increase in insect life. --May 7. Plant lice have appeared on wild cherry trees, and the currant worm (*Pteronotus ribesii* Scop.) is at work, both eggs and larvae being found. No nests of tent caterpillars have been observed this week. The weather is warm and dry. --May 1. Potato beetles (*Doryphora 10-lineata* Say) were observed May 16, and currant lice (*Myzus ribis* Fabr.) were just appearing on the leaves on the same date. --May 21. Black flea beetles (*Crepidodera cucumeris* Larr.) are appearing on potato leaves, and some insect is feeding quite generally on plantains, (very probably *Dibolia borealis*...

Reviews

Most of these publication is the perfect ebook accessible. It is amongst the most awesome publication i have got read through. You wont truly feel monotony at whenever you want of the time (that's what catalogs are for regarding in the event you request me).

-- **Prof. Edgar Kshlerin**

It is easy in study safer to comprehend. It can be written in basic phrases and never confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Emmitt Harber**
